

8K and 4K HDR Picture Library

VT-7009

VT-7009 Picture Library is a license option for VG-876/879 series Digital Video Signal Generator. It contains 14 natural images and scale patterns for evaluating High Dynamic Range (HDR).

Main Features

- 8K (7680 x 4320) and 4K (3840 x 2160) images with 10 and 12-bit versions to choose from.
- HDR standards of SMPTE ST 2084 (1000nits, 4000nits), HLG and SDR each format.
- ITU-R BT.2020 (Rec.2020) color space is supported.
- 14 various natural pictures and scale patterns are provided.
- With a reference manual that indicates proper evaluation of luminance, color, gradation and solidity.
- Easy operation by calling image number stored on a USB memory, in a format of the signal generator (VGD format).

Specifications

Format, Color Depth		
Resolution	Color Depth	Shooting format
8K (7680 x 4320)	10-bit, 12-bit each	SMPTE ST 2084 (1000nits, 4000nits), HLG, SDR each
4K (3840 x 2160)	10-bit, 12-bit each	SMPTE ST 2084 (1000nits, 4000nits), HLG, SDR each
Storage Media	USB Memory (2 pcs)
