VisionRGB-E2S

Dual Channel Capture Card

PACKING LIST

Your packing box should contain the following items

The VisionRGB-E2S dual channel capture card.

2 x DVI-VGA, 1 x DVI/Component and 1 x DVI/HDMI Adapters.

(For latest drivers go to www.datapath.co.uk).

NOTE:

All plug-in cards are static sensitive and are packed in antistatic materials. Please keep the card in its packaging until you are ready to install.

HARDWARE INSTALLATION

You are likely to need a flat blade and a Phillips head screwdriver for the installation of the VisionRGB-E2S card; it would be useful to have these to hand before you begin.

Power down the PC (including peripherals), switch off at the mains and disconnect all the cables connected to the computer, noting the positions for accurate reconnection. Remove the PC cover.

Locate a vacant PCIe slot (x4 or higher) on the motherboard and remove the backing plate (retain all screws).

If in doubt consult your motherboard documentation to correctly identify a PCIe (PCI Express) slot.

Remove the VisionRGB-E2S card from its packaging and secure it firmly into the empty PCIe slot.

Reconnect all cables to the PC then connect the cable distributing the RGB or DVI signals to the connectors on the VisionRGB-E2S card located on the back panel.

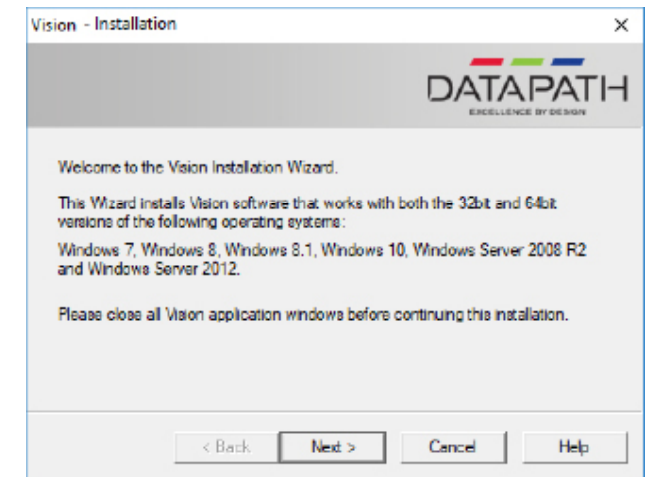

Power up the PC and commence the software installation.

Screw the VisionRGB-E2S bracket to the back panel of the PC and replace the cover.

Connect the cable(s) distributing the RGB or DVI signals to the connectors on the VisionRGB-E2S card located on the back panel. Reconnect all cables to the PC.

SOFTWARE INSTALLATION

Download the the required driver **install.exe** from the Support pages on the Datapath website and follow the Installation Wizard instructions as prompted.

We suggest that you regularly visit the Datapath web site for information on updated drivers. www.datapath.co.uk

It is strongly recommended that you read the detailed help instructions on completion of the installation. Each help topic may be printed for ease of use.
