ELAN surveillance cameras feature one-click camera setup with ELAN Discovery.

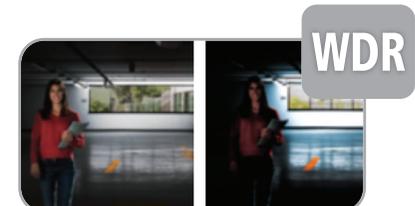

Illumination from Infrared (IR) LEDs enables night vision up to 30 meters.

Motion in front of the camera will be detected and saved as an event.

Back Light Compensation adjusts the exposure of the image to properly expose the subject of interest.

Wide Dynamic Range improves image quality by balancing dark and light areas in an image.

Intelligent Indoor Monitoring.

The ELAN EL-IP-IDF2 and EL-IP-IDF4 dome cameras are perfect for indoor applications in which a wide area such as a large foyer or living room needs monitoring and a visually unobtrusive camera is preferable.

The ceiling-mounted ELAN EL-IP-IDF2 and EL-IP-IDF4 provide high resolution video, Lens Distortion Correction, 3D Digital Noise Reduction, flexible mounting options and a seamless and clean aesthetic compared to bullet or turret cameras.

ELAN Discovery

Like all ELAN Surveillance products, the ELAN EL-IP-IDF2 and EL-IP-IDF4 are embedded with the ELAN beacon, making them effortless to install in an ELAN system. In the Configurator, ELAN Discovery scans your network, both wired and wireless, automatically discovering the SSIDs of

available devices. With a click, the camera is configured and installed in the ELAN system. We've eliminated the need to use a secondary application to setup the device outside of ELAN—saving you substantial time on every surveillance installation.

The ELAN EL-IP-IDF2 and EL-IP-IDF4 cameras have the quality, reliability, best-in-class features and ELAN customer support that you and your clients rely on.

Comprehensive Surveillance

ELAN Surveillance cameras work seamlessly with the ELAN Network Video Recorder (EL-NVR Series), to create a surveillance ecosystem that excels in every application.
