

PART NUMBERS: HW-EBI-100 IRRIGATIONBRICK

The **OneHome IrrigationBrick** provides convenient access and an easy-to-use interface to your irrigation system, simplifying the management of your watering while you are at home or away. With the **OneHome IrrigationBrick**, your property will flourish, and you'll save money.

Features and Benefits

Ease of Use: Clear and simple interface for scheduling and controlling your irrigation system.

Convenience: Monitor and control irrigation from inside the home or while away.

Savings: Optimize watering schedules based upon weather forecasts and seasonal changes.

Flexible: Zones are broken into Zone Groups to make it easy to apply changes across several zones. Each Zone Group can have any number of start times, with watering days that can be set to handle a wide range of situations.

Seasonal Adjustment: Setup your season to automatically increase watering as spring becomes summer, and then drop back again in the fall.

Peace of Mind: Manage your irrigation effectively, and rest easy knowing your landscaping investment is well cared for.

The OneHome interface is convenient and easy to use, so you will keep the watering schedules in sync with the needs of your plants.

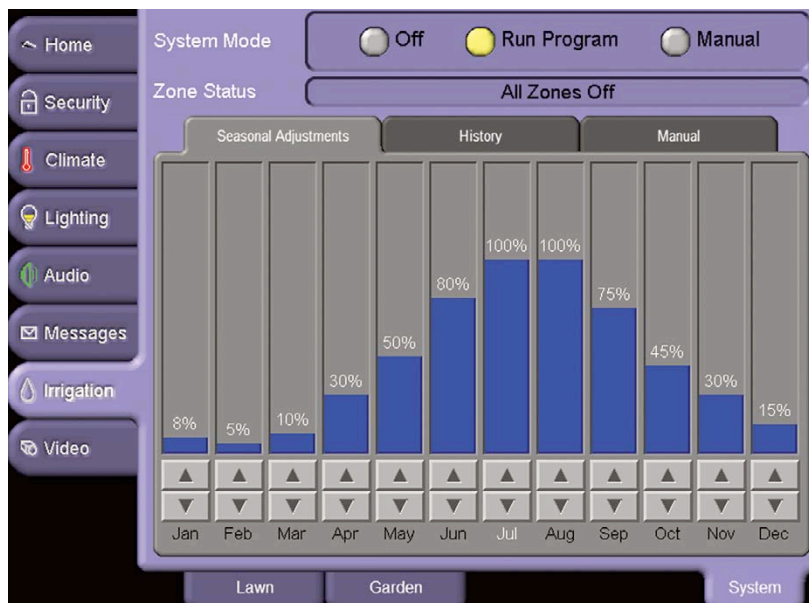

Zone "groups" allow you to organize common plant types. For example, use a "Lawn" group for grass zones and a "Flower Bed" group for drip irrigation zones in your flower beds. Then easily increase or decrease all the grass watering without changing the flower beds, or turn off the flower beds without changing the lawn.

The history view shows the past several months of watering, allowing you to see how much water has been applied to your landscaping.

With the OneHome Irrigation solution, managing your irrigation system becomes simple and straight forward, saving money and conserving water.

PART NUMBERS: HW-EBI-100 IRRIGATION BRICK

Zone Name	Manual-Mode Run Time
1: South Lawn	40:00
2: South Lawn	40:00
3: South Lawn	40:00
4: South Lawn	40:00
5: West Lawn	60:00
6: Northeast Beds	45:00
7: Southeast Beds	45:00
8: Courtyard	45:00

Manage your irrigation with our award winning interface: Set the start time, watering time and days to water (other side). Use the Seasonal Adjustment tab to automatically decrease watering in the spring and fall (above). Check the system with the History view (above right), to see when and how long each zone ran. Use the Manual tab to run a zone by hand (right).

Specifications

HW-EBI-100 IrrigationBrick

Number of Zone Groups	16
Number of Zones	48
Package Contents	Includes 1' Ethernet patch cable

Compatible Systems Include: Hunter (SRC, Pro-C, ICC) and more.
For an up-to-date list of compatible systems please check our Web site.
