BlueBOLT™ 2.0
IP Power Management Platform

AVAILABLE NOW

The New BlueBOLT 2.0 is Here!

BlueBOLT® was the original IP Power Management platform, and now the new BlueBOLT 2.0 sets a new standard for remote management, with an intuitive and fast UI backed by a robust new IP infrastructure for maximum reliability. BlueBOLT reduces service calls with remote reboots of problem devices, maximizes network health with scheduled power cycles, and self-heals network devices to save money & time. And of course, BlueBOLT pairs with Panamax® and Furman® power conditioners, the most comprehensive protection and performance in the market, used for mission-critical projects world-wide.

New in BlueBOLT 2.0
The new BlueBOLT 2.0 adds a clean, intuitive UI, is easy to quickly move between installations and devices within each installation, and adds important new features:

1.

1. Watchlist
Allows tagging of high priority locations & devices

2. Super Search
Faster search engine to find customers, locations and devices.

2.

3. Advanced Admin
Manage access rights for individuals as well as groups.

3.
