

Peeling Attachments GT-10, GT-20

Optimal attachment to measure the peeling or shearing force of IC chips

Feature

- The attachments are useful to measure minute force because of their light weight.
- They are suitable for measuring force in the small areas.

Application

- The peeling attachment is installed on the a force gauge for peeling or shearing test of electronic components.

Note

- Combining with a test stand, more stable measuring becomes possible.
- All information is subject to change without prior notice.

Specifications

	GT-10	GT-20
Model	peel	push
Capacity	500 N	
Mounting screw	M6	
Dimension	115 x 11.3 (WxØ)	
Weight	34 g	
Recommended force gauge	PS/FB/DS2/ZTS/ZTA series up to 500 N
