

180° Peel strength table P180-200N

Suitable for 180° Peel adhesion test

Feature

- Suitable for 180 degree peeling test with various materials.
- Adjustable peeling angle by changing table position
- According JIS Z0237 standard (Testing methods of pressure-sensitive adhesive tapes and sheets)

Applications

- The 180° peel strength table is installed on a motorized test stand for peel adhesion test of various glueing.

Note

- All informations subject to change without prior notice
- Force gauge, test stand and grips are needed for force measurement
- This product is designed for measurement purpose only

Specifications

Model	P180-200N
Capacity	0.5 - 200 N (20 kgf)
Sample length	max. 150 mm
Sample width	max. 40 mm
Weight	approx. 300 g
Recommended force gauge	DST, DSV, ZTS and ZTA
Recommended test stand	MX2-500N-L, MX2-1000N-L, EMX-1000N-L

Peeling stroke for each test stand

Test stand	Peeling stroke
MX-500N-L	Approx. 120 mm
MX2-500N-L	Approx. 70 mm
MX-1000N-L	150 mm (Full length of peeling table)
MX2-1000N-L	150 mm (Full length of peeling table)
EMX-1000N-L	150 mm (Full length of peeling table)
