

## 90° Peel strength table P90-200N

Suitable for 90° Peel adhesion test

### Feature

- This table keep the measurement angle as 90° by self adjusting sliding system.

**Applications**

- The 90° peel strength table is installed on the force gauge and motorized test stand for peel adhesion test of various glueing.

**Note**

- When you order only P90-200N, you will need additional processing on force gauge mounting plate (e. g. film grip series FC).
- All information is subject to change without prior notice.

### Specifications

Model	P90-200N
Capacity	200 N (20 kgf)
Sample length	maximum 155 mm
Sample width	maximum 80 mm
Weight	approx. 2 kg
Recommended force gauge	we recommend digital force gauges, because the stroke of mechanical force gauges is so big, that it can not keep measurement angle 90°.
Recommended test stand	MX-500N, MX2-500N, MX-1000N, MX2-1000N
