

LANDSCAPE SUBWOOFERS

SC-BT-12 | SC-BT-10

Bold Outdoor
Performance with
Long-Lasting
Durability

Complete your outdoor listening experience and hear the rocking bass you've been missing with Speakercraft Landscape Subwoofers.

Built with the same material that's used to distribute municipal water underground, the waterproof enclosure is buried leaving only a discrete canopy that blends into the outdoor environment. It is also protected by an aluminum grille, ensuring water, dirt, and critters don't get inside.

Available in 2 sizes, the subwoofer, cabinet and port design are computer-optimized to deliver deep distortion-free bass that fills your outdoor space.

SpeakerCraft®

Features

Built to Last - Waterproof HDPE enclosures are made from the same material used in municipal water supply lines. We even dunk test every subwoofer before it ships to ensure no leaks.

High-Flow Port Design - The internal design of the port and canopy assembly spreads moving air evenly in a 360-degree pattern, reducing air turbulence and eliminating annoying port noise.

Critter-Proof Cover - The port assembly is covered by an aluminum mesh grille that allows unrestricted airflow yet prevents intrusion of bugs, animals and debris.

Performance - The subwoofer's low impedance 8Ω design is the best option when it comes to delivering jaw dropping performance in an outdoor environment.
