SC-SB-40P

40" 3-Channel Passive Soundbar

TRIPLE 2-WAY LCR SOUNDBAR

IMPACTFUL PERFORMANCE, EASY INSTALL

Pair with 40"-50" displays in small to medium sized rooms

Use this three-channel passive soundbar with any A/V receiver to build a compact yet powerful home theater system, or connect to a whole home multi-zone amplifier. It features six 3" graphite woofers, three 1" titanium dome tweeters, and 60 watts (per channel) power handling.

The SC-SB-40P has a matte black finish and removable black grille with neo-magnets. Includes a horizontally adjustable wall-mounting bracket.

- SIX 3" GRAPHITE WOOFERS
- THREE 1" TITANIUM TWEETERS
- 60 WATTS PER CHANNEL

SC-SB-40P 40" 3-Channel Passive Soundbar

Features

- **Isolated LCR Chambers:** Connects to the left, center and right channels of an A/V receiver or a multi-channel home theater amplifier. The Left/Right chambers are vented enclosures, ideal for sound effects and deeper bass. The SB-40P uses a sealed box design for the Center chamber to have lower group delay and more controlled excursion.
- **Six 3" Woofers:** The woofers use a special formulation of graphite, polypropylene, and carbon fiber materials, combining them using an injection molding process. The qualities of these different materials work together to deliver exceptionally clear mid-range, as well as the stiffness and strength required to produce strong low frequencies that blend well with any subwoofer.
- **Three 1" Titanium Tweeters:** Accurately reproduce high frequencies and rapid transients. It is light, thin and stiff, yet delicate, therefore protected with three tweeter bars. The material properties of the IMG woofer cones and titanium tweeters work together to provide a spacious, open sound stage that seems more like it's coming from three separate speakers instead of a soundbar.
- **Crossover Networks:** The SB-40P's three high-quality internal crossover circuits (one per channel) are carefully tuned through measurement and subjective listening tests for outstanding room-filling natural sound.
- **Surface Placement:** The SB-40P soundbar should be placed on a stable surface directly under a display. Attach the included feet to the bottom four corners of the soundbar to minimize vibration.
- **Wall Mounting:** An included mount makes it easy and quick to attach the SB-40P to a wall. It's designed to screw into wall studs mounted 16 inches on-center. It allows you to slide the soundbar horizontally, so it lines up perfectly with the center of the television.
- **Bass:** The SB-40P delivers outstanding, balanced bass as a standalone audio solution – but when paired with a SpeakerCraft® subwoofer, users will enjoy truly cinematic sound.
- **Cabinet:** Made from thick and rigid MDF rather than molded plastic like most soundbars. The result sounds more like high-end bookshelf speakers than a typical soundbar. The black polymer coating helps to acoustically seal and dampen the enclosure.

Specifications

Material	Six 3" Graphite Woofers Three 1" Titanium Dome Tweeters
Power Handling	60 Watts
Frequency Response	140HZ - 20kHz
Impedance	6Ω
Sensitivity	88dB 2.83V/1m
Cabinet Design	Rounded Corner MDF Cabinets
Dimensions (L x W x H)	(H x W x D): 5.18" x 39.8" x 2.75"
